

NAGA[®] nord

UNIQUE DANISH DESIGN ON YOUR WALL

Simple Nordic Style

This product range offers exciting materials, shapes and colours with many options for storage as well as decoration.

It will fill a purpose in every room in your home.

Especially developed in a simple Nordic style, all materials, surfaces and colours are selected with inspiration from nature.

These uniquely shaped design products can be mixed and matched in many possible combinations to fit any interior style.

Unique Danish design on your wall

Magnetic Circle Boards

A magnetic circle board, makes it possible to combine simple Nordic style and functionality.

All the boards are magnetic, which allows you to attach various accessories onto the board with our super-strong magnets.

The glass boards and mirrors also have a write-on/wipe-off function. You can write on the glass with a chalk marker or a regular whiteboard marker, and once the text has dried, you can easily wipe the board clean with a chalkboard eraser or a dry cloth.

NAGA Nord circle boards are decorative and practical in every room of your home.

Inspiration from nature

NAGA magnetic circle boards in a great variety of materials,
surfaces, sizes and colours

The boards are produced from natural materials, so the exactly
identical colour and structure from board to board can't be
guaranteed.

We have prepared a guide, in several languages, for the care and
maintenance of the boards, so it can last for a long time. Please
note that the boards is affected by daylight and wear.

You find the guide at www.naga.dk

We have prepared this guide for the care and maintenance of NAGA Nord boards, so it can last for a long time.

Find the guide in several languages, on www.naga.dk

Please note that your board is affected by daylight and wear.

Wood boards:

NAGA wood boards are made of high-quality plywood. Plywood is a natural material and there will therefore be natural variations in the surface texture and colour. The surface is affected by light, and over time it will change texture and colour.

Always use microfibre cloths for maintenance and cleaning. They are soft and will not damage the surface.

There are 3 different types of NAGA Nord wood boards:

Oak:

This is a soap-treated board that should be maintained using a damp cloth with soap flakes dissolved in water.

Teak:

This is an oiled board, which must be maintained with oil. Use regular household oil on a soft cloth.

Walnut:

This is a lacquered board that can simply be wiped clean with water. Use a slightly damp cloth.

Glass and mirror boards:

In addition to the magnetic function, coloured and printed glass boards and mirrors also have a write-on/wipe-off function. You can write on the glass with a chalk marker or a regular whiteboard marker, and once the text has dried, you can easily wipe the board clean with a chalkboard eraser or a dry cloth. For thorough cleaning, use whiteboard cleaner or regular mirror glass cleaner and a soft cloth. It is important you use a soft cloth to avoid scratching the glass.

Concrete boards:

This is a raw, untreated material that can be protected using soap flakes dissolved in water, applied with a damp cloth. The same method can be used for cleaning. Do not use acidic cleaning agents, since these will corrode the surface.

Cork, Metal and Painted boards:

These requires no care beyond normal cleaning with a damp cloth.

The board is delivered in a gift box, with screws and plugs

How to mount a circle board:

The board comes with screws and raw plugs.

There is metal on the back of the board. The back is provided with 4 holes. You decide if you want to hang the board just on a screw. Or you want to hang it on two screws which make the board more stable.

You're finished!
The board is ready for use.

1 option

With only one screw:
Mark the location on the wall and drill a hole. Put the plug into the hole. Screw in the screw. Hang the board on the screw.

2. option:

With two screws
Use a piece of self-adhesive tape. Attach the tape on the top of two of the holes on the back of the board. Mark with a pen in the center of each hole. Attach the adhesive tape on the wall. Drill two holes through the tape. Put the plugs into the holes. Screw in the screws. Hang the board on the screws.
